

Green Fares: More sustainable air travel

In order to achieve our goal of CO₂ neutrality by 2050, the Lufthansa Group airlines are setting things in motion. The Green Fares are a good example of this as they enable more sustainable travel both throughout Europe and on selected intercontinental routes.

Selecting one of the **Economy Green, Premium Eco Green, Business Green or First Green fares on intercontinental routes** will reduce 10% of individual flight-related carbon emissions by using sustainable aviation fuels (SAFs) and offset the remaining 90% of individual flight-related carbon emissions by contributing to high-quality climate protection projects.

The intercontinental Green Fares at a glance

The intercontinental Green Fares can now also be **booked via NDC and in the GDS as unpublished/private fares (without account code)**. As part of a test run; they are available on the following routes (O&Ds):

- Bangkok (BKK)–Vienna (VIE)
- Brussels (BRU)–Kinshasa (FIH)
- Frankfurt (FRA)–Bengaluru (BLR)
- Frankfurt (FRA)–Miami (MIA)
- **Hong Kong (HKG)–London (LHR)**
- **London (LHR)–Hong Kong (HKG)**
- Munich (MUC)–Seoul (ICN)
- Nairobi (NBO)–Frankfurt (FRA)
- Paris (CDG)–Bangkok (BKK)
- São Paulo (GRU)–Zurich (ZRH)
- Singapore (SIN)–London (LHR)
- Zurich (ZRH)–Los Angeles (LAX)
